# Deep Learning Advancement in Image Recognition for Self-driving Cars

The ability to determine the difference between foreground or background pixels is a problem that has impacted many applications from cars to biomedical image analysis. Recently, Dr. Abhinav Valada and his team developed an "EfficientPS" AI model that allows for the recognition of these scenes to be done more expeditiously.

# From the Career & Professional Development Team

Are you breaking into the IT field but have little to <u>no experience?</u> It can be frustrating when looking for an "entry level" job that may require you to already have 2-3 years of experience. The first step is to <u>research employers</u> to find out more about their expectations. Next, while <u>job</u> <u>searching</u>, the job descriptions can be your best friend to find required skills. If you're already employed, meet with your manager to explore your <u>career goals</u> and new ways to grow in your field. Contact our <u>Career & Professional Development</u> office for career support and next steps.
