

Meeting the Moment

Bringing Forward the Best of Online and Blended Learning Innovation

Mark David Milliron
mark.milliron@wgu.edu

“I’m not an optimist. That makes me sound naïve. I’m a very serious ‘possibilist’ . . . It means someone who neither hopes without reason, nor fears without reason, someone who constantly resists the overdramatic worldview. As a possibilist, I see all this progress, and it fills me with conviction and hope that further progress is possible . . . It is having a clear and reasonable idea about how things are. It is having a worldview that is constructive and useful.”

What COVID-19 Means For Community Colleges

Essays • Communications Staff • Monday, 08 February 2021

From enrollment to instruction, no part of open-access postsecondary education has remained untouched by the coronavirus. Since the pandemic began, our researchers have written several blog posts and contributed to dozens of news stories related to the community college sector's response and its future, all of which you'll find below. We will continue to update this page, as well as our [COVID-19 blog series](#), as this crisis continues.

The background is a vibrant, abstract composition of red and orange tones. Large, glowing spheres of varying sizes are scattered throughout, some appearing as bright suns or planets. Wisps of white smoke or steam rise from the bottom, partially obscuring a central illustration of a grey clock tower. The tower has a white clock face with Roman numerals and a dark, pointed roof. The overall scene conveys a sense of intense heat and crisis.

How Much Has Covid Cost Colleges? \$183 Billion

The financial situation is dire. But colleges that stay focused have a fighting chance.

An Open Letter to Students:
You're the
*Game
Changer* in
Next-
Generation
Learning

By Mark David Milliron

In a follow-up to a recently published EDUCAUSE Review Game Changer, I discussed how educators can use technology to create a more engaging and effective learning environment. In this article, I explore how educators can use technology to create a more engaging and effective learning environment.

The pages of *EDUCAUSE Review* are full of examples, solutions, and technologies' blood, sweat, and tears poured into new educational technologies and techniques, over hundreds of thousands of hours, to bring next-generation learning to life for you, the student. Article after article speaks of the challenge of changing tired traditional systems and leveraging emerging novel technologies. Heck any basic metaphor—it's been used by an author in these pages to talk about how difficult the task is. But still these educators and technologists stick to it, investing in the hopes of inspiring and better enabling your learning.

Catalyzing a Culture of Care and Innovation Through Prescriptive and Impact Analytics To Create Full-Cycle Learning

Abstract

Student success, both during and after college, is central to the mission of higher education. Within the higher-education and, more specifically, the student-success context, the core raison d'être of machine learning (ML) is to help institutions achieve their social mission in an efficient and effective manner. While there should be synergy among people, processes, and ML, this synergy is not often realized because ML algorithms do not yet connect the dots on fully understanding and strategically fostering student success. Transitioning from risk to impact prediction is a catalyst for institutional transformation, which can lead to continuous learning and student-success process innovation. This paper explores how ML can complement and facilitate organizational transformation in promoting a culture of care and innovation through virtuous full-cycle learning.

WHAT DOES IT MEAN TO BE HUMAN IN A DIGITAL AGE?

ABOUT

THE HOPE CENTER

Too many students leave college without credentials because life, logistics, and a lack of money got in the way. These #RealCollege students are the new majority, but they are often ignored. The Hope Center for College, Community, and Justice is home to an action research team using rigorous research to drive innovative practice, evidence-based policymaking, and effective communications to support #RealCollege students.

Thoughts on the Sugar Chair

The empathy running through these age-appropriate stories is breathtaking – even Buddy the dog shows us how to look at things through other's eyes. The young readers and listeners to these stories will be engaged for sure, and will think more about others as result, whether or not they need a little time sitting on the Sugar Chair.

**-Andrew T. Watson, Head of School, Albuquerque Academy
Board Member, National Association of Independent Schools**

Who wouldn't be well-served by the refrain "Slow down, look around, figure out how to sweeten things up"? The Sugar Chair Stories invite us all to step into the magical land of childhood and the wise lessons of Buddy and his human family. Children of all ages are invited towards the meaningful conclusion that we can always make any situation better when we look to sweeten things up. These stories are a perfect complement to any school or household's goals towards social, emotional and ethical learning.

**-Emily McCarren, Ph.D., Academy Principal, Punahou School
Board Member, Global Online Academy**

The power of the Sugar Chair and associated stories is in helping children—and adults—slow down, engage in quiet reflection, and plan for "sweetening things up." So necessary in today's world. I'm out looking for a Sugar Chair!

**-Suzanne Walsh, J.D., President, Bennett College
Former Deputy Director, Bill & Melinda Gates Foundation**
